

HOW TO DON STERILE GLOVES

1. Wash hands or use hand sanitizer
- 2-3. Open glove package completely, “like a book”. Do NOT touch inside of package.
4. Using thumb and index finger of left hand, grab the folded edge of glove right. Place right hand into the glove.
5. Pull glove completely onto the right hand. Do not adjust cuff.
- 6-7. Place right hand fingers into cuff of the left glove and pick up off the paper.
- 8-10. Pull glove onto the left hand, lift up the right thumb being careful not to touch onto your skin. Stretch glove out and let it go.
11. Adjust gloves by touching ONLY the fingers. DO NOT adjust the cuffs at the wrist.
