

TeleHealth Dermatology

Why is Allina Health Using TeleHealth Dermatologists?

Having access to a dermatologist helps provide timely support and care.

What Happens During Your Visit?

A member of your health care team has requested you meet with a dermatologist.

He or she will take a picture of the area of concern on your skin with his or her cell phone and upload the photo directly into your medical chart. The photo will not be saved on the cell phone.

The dermatologist will:

- review your medical history
- review the picture
- tell your hospitalist what he or she found
- write a treatment plan for you.

Your insurance will be billed for this visit. You may receive a bill if you have a copay or have not yet met your deductible.

Whom To Ask for More Information

Talk with your nurse if you have any questions about this service.
