What Should You Put on Your Plate?

Fruits

Melon Berries Apples Oranges Pears Plums

Vegetables

Carrots

Broccoli

Asparagus

Salad

Green beans

Tomato

Cucumber

Starches

Bread (whole grain)

Potatoes

Pasta/Rice

Beans (navy, pinto, black)

Corn/Peas

Proteins

Meat (lean)

Fish/Poultry (no skin)

Cheese (low fat)/Eggs

Nuts

When you are planning your meals, try to think about what your plate should look like.

For breakfast:

half of your plate should be starches

the other half should be split between protein and fruit.

For lunch and dinner:

- half of your plate should be full of non-starchy vegetables
- the other half should be split between protein and starches
- a small dish of fruit, if you want.

What to drink:

Sugary drinks and juice can add empty calories and carbohydrates. Limit or avoid drinks that contains sugar, such as iced tea, lemonade, soda, flavored waters, and any drink that is labeled as "sweetened." Instead, choose:

- 1 cup skim or 1 percent milk
- ½ cup 100 percent juice
- 1 cup coffee or tea (no sugar)
- 8 ounces diet soda

(over)

■ water.

What Real Portion Sizes Look Like

When preparing meals, consider these portion sizes:

■ pasta/rice: 1/3 cup cooked*

meat: 3 ouncescheese: 1 ounce

■ peanut butter/salad dressing: 1 tablespoon

■ butter/mayonnaise: 1 teaspoon

*This portion equals one carbohydrate choice. Most people with diabetes can have three to four carbohydrate choices per meal.

If you choose to have all of your carbohydrate choices in pasta, you will need to avoid other carbohydrate foods (such as milk, fruit, starchy vegetables and dessert) at that meal.

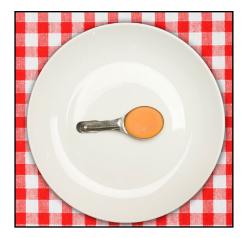

One serving of cheese.

One serving of chicken.

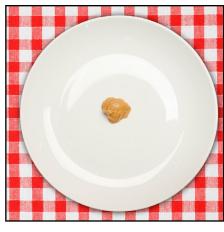

One serving of butter.

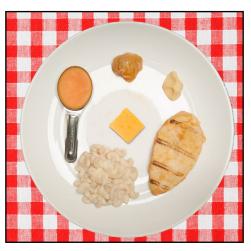

One serving of salad dressing.

One serving of pasta.

One serving of peanut butter.

The foods pictured are on a nine-inch dinner plate.
