

Wheelchair Seating Clinic

Wheelchair Seating Clinic

The Wheelchair Seating Clinic at Courage Kenny Rehabilitation Institute can help identify the right wheelchair seating for you.

A physical therapist or occupational therapist will meet with you and anyone you want to invite. (You can invite someone from your medical equipment supplier, caregiving team and care circle.)

The evaluation may include your:

- mobility
- everyday activities
- range of motion
- muscle strength and tone
- sensation
- posture and sitting balance
- skin integrity.

Special imaging may be used to find the best wheelchair seating to help protect your skin.

The physical therapist or occupational therapist will:

- decide what's best for your needs
- work with medical equipment suppliers to get equipment you can try at home
- fill out the paperwork for insurance coverage once your trial period ends and your final equipment needs are made
- give you other care as needed.

Referral

You need a referral from a doctor before you can schedule an appointment.

Your doctor can make a referral by fax at 612-262-7860 or phone at 612-262-7900.
