

Your Plan for Leaving the Hospital (Discharge)

After Hip or Knee Surgery

Your Hospital Stay

The number of days you will be in the hospital will depend on how quickly you recover. You will leave the hospital (discharge) when you meet your therapy goals and you are medically stable. This includes:

- your pain is managed with pain medicine (by mouth)
- being able to pass urine without problems (or having a plan for this)
- being able to eat your regular foods
- being able or having a plan for activities of daily living (getting dressed, bathing)
- moving safely with an assistive walking device
- understanding how to do your exercises
- being able to go up and down stairs, if needed.

Remember, each person's recovery will be different. Your health care team will help guide you through your recovery and help determine a safe discharge plan.

Important Things to Know Before Discharge

Make sure you know the answers to the following questions before discharge.

- How do I care for my incision?
- What follow-up appointments do I need?
- Do I have activity restrictions?
- Do I understand my new medicines?
- Do I have my discharge medicines or know where to pick them up?

Please ask your driver to be at the hospital the day of discharge at the time your nurse shared with you.
