

When it Comes to Stroke, BE FAST

	B	Balance – Sudden difficulty with balance
	E	Eyes – Sudden problems with vision in one or both eyes
	F	Face – Face or smile droops on one side
	A	Arms – Sudden weakness in arm or leg
	S	Speech – Unable to repeat a simple sentence, or slurred words
	T	Time – If you observe any of these symptoms, call 9-1-1 immediately

Fast action can save brain function when having a stroke. There are several treatments for stroke, but they work the best in the first few hours after stroke symptoms start.

If you have any of the above symptoms, do not delay! Call 911!
