- weight gain.

## Special Notes

- The following foods can cause severely high blood pressure, which can cause death.  
**Do not eat the following foods:**
  - brewer's yeast
  - Chianti wine
  - chicken livers
  - meat tenderizers
  - pickled foods (herring, sauerkraut)
  - sherry
  - strong aged or ripened cheese.
- Do not eat or drink large amounts of:
  - aged red wine strong beer
  - cured, aged or smoked meats or fish
  - dried fruits (canned figs, raisins, prunes)
  - over-ripe bananas or avocados
  - snow peas, fava beans
  - soybeans and soy products
  - soy sauce, shrimp sauce, fish sauce, miso and teriyaki sauce.
- You may want to wear a medical bracelet or necklace that identifies you as someone who takes MAO inhibitors.
- Tell other health care providers you are taking MAO inhibitors. The medicine may interfere with other prescriptions.
- Tell your mental health provider if you become pregnant or start breastfeeding while taking MAO inhibitors.

**(over)**

## Other Medicine Information

- Tell your mental health provider if you are taking **any** prescription, over-the-counter, herbal or natural products, or alcohol. They may interfere with MAO inhibitors.
- Talk with your mental health provider if you are thinking of changing doses, starting a new medicine or stopping any of your medicines.

## When To Call Your Mental Health Provider

Call your mental health provider if you:

- develop a rash or hives
- feel chest pain
- feel heart palpitations (irregular heartbeats)
- have a severe headache
- have neck stiffness, soreness or both
- have severe nausea and vomiting
- have unusual sweating
- have unusual eye sensitivity to light

Talk with your mental health provider, nurse or pharmacist if you have questions.
